The Honourable Chairman,
APERC,
Hyderabad

Respected sir,

Sub : Response to public hearing on OP NO. 02 of 2020 - Amendment to APERC
(Terms and conditions Of open Access) Regulations, 2005 Regulation No.
2 of 2005.

Ref: Lr.No.CGM/HRD & Plg/EE-Comml/DEE-1/F-Indian Oil/D.No.04/2020 dt
03.01.2020

We M/s Indian Oil Corporation Limited have established 3 MW at IOCL, Indian Oil
LPG Bottling Plant, YSR Kadapa (District) under Captive Use Scheme. The project
was commissioned in on 18/07/2018 under AP Solar Power Policy 2015.

We are in the 2nd year of the project life time and we perceive that APTRNASCO and
the DISCOMS are planning to remove the benefits the following benefits given by
AP Solar Power Policy 2015.

- A) Exemption of Wheeling charges.
- B) Exemption of Cross Subsidy surcharge
- C) Exemption of Transmission charges/losses.

The AP Solar Power Policy 2015 is intended to have the operative period for 10
years. By planning to remove the above benefits, we will have to pay a total grid
charges of Rs 5.61 per unit (0.35 Rs/kWh as transmission Charges, 2.50 Rs/kWh
as wheeling charges to APSPDCL and 1.01 Rs/kWh as wheeling charge to APEPDCL
and 1.75 Rs/kWh cross subsidy surcharge) to the DISCOMS and APTRNASCO. This
will have a huge impact on financial viability of the project.

Law

V. Venkatesh Rao
09/03/20

Any new policy introduced will have applicability only on the projects implemented in its operative period. Similarly, AP Solar Power Policy 2019 should be made applicable only on the new projects commissioned after inception of the policy and not on the projects commissioned in the AP Solar Power Policy 2015.

We Pray The Honorable chairman, APERC to add a condition that amendments are applicable to projects executed under AP Solar Power Policy 2019 only and not for the projects commissioned under old Policies.

Thanking you Sir,

Yours Faithfully,
For Indian Oil Corporation Limited
